## AIR SCENARIO'S RECAP

- None of the pre-lodged TSD scenario's seemed feasible to the air community
  - ? Pre-lodged TSD scenario lodged by TSF2 (e.g. Bpost, express courriers, ...) taken into consideration?
- Baseline = combined TSD with ENS re-use lodged by ground handler
  - If no ENS is available, full TSD dataset needed
  - ENS re-use = deconsolidation by default
    - No amendment / deconsolidation notification allowed
    - → HAWB quantities as declared in ENS to be written-off
- Recap of 3 scenario's:
  - 1. Combined TSD (ENS re-use) by ground handler / PCS, transfer by TSF2
  - 2. Combined TSD (full dataset MAWB) by ground handler / PCS, transfer / deconsolidation by TSF2
  - 3. Pre-lodged TSD (full dataset MAWB / HAWB) by TSF2, PN by ground handler / PCS, transfer by TSF2
