

REPRESENTATIVES AES

No Representation

- Only one actor exists in the export declaration (Exporter)
- Exporter is equal with the Declarant, meaning that D.G. Exporter and D.G. Declarant are filled in with the same EORI in IE515.
- D.G. Representative is not to be used in IE515.

Direct Representation

- Two actors are involved in the export declaration (Exporter and Direct Representative).
- Representative represents the declarant in a direct status. The D.G. Representative is filled in with the direct representative's EORI and the status is '2'(direct).
- Exporter is equal with the Declarant, meaning that D.G. Exporter and D.G. Declarant are filled in with the exporter's EORI in IE515.

Indirect Representation

- Two actors are involved in the export procedure (Exporter and Indirect Representative)
- Exporter is different from the Declarant, meaning that D.G. Exporter and D.G. Declarant are filled in with the different EORI's in IE515. The D.G. Declarant is filled in with the EORI of the indirect representative of the exporter. The D.G. Exporter is filled with the EORI of the exporter.
