

# WG ICT - softwareleveranciers

## REPORT

24-05-2018

<b>CONVENOR</b>	Bart Cieters (AAD&A) & Albert Palsterman (CRSNP)
<b>REPORTER</b>	Albert Palsterman (CRSNP)
<b>PRESENT</b>	Albert Palsterman, Stream Software Jan Van Wesemael Alfaport Voka Eric Duchesne, NxtPort Renko Ruiten, ABM Data Patrick Braat, Softpack Peggy Cole, Organi Dorothy Verthé, Customs IT Martin Goblet, Ziegler Janik Monsieurs, Descartes Jim Styleman, AEB Guy Van Den Driessche, MSC Stella Melis, Logiqstar Anneleen Vekemans, Deloitte Wouter De Vlieger, AADA Bart Cieters, AADA Ann Moorhem, Volvo Cars Geert Callebaut, Volvo Group Belgium
<b>EXCUSED</b>	Linda Garcia, SAP Pieter Haesaert, C4T David Vandendriessche, AAD&A Sjoerd Dufoer, AAD&A An Van Gysel, Norriq Mark De Keyser, Avantida Philip Trouwen, MIC Laurent Moyersoer, NxtPort Kristof Poulain, Organi Sarah Broux, Norriq Frank Van Herreweghe, Streamsoftware Patrick Vandelooverbosch, Intris Roy van Montfort, Amberroad

Info : The questions from CRSNP are in black normal format.  
*The replies from customs are in blue italic format.*  
**The last questions and new topics of CRSNP are marked in yellow.**

### 1. EORI for Import

Where a company has an EORI number but no VAT number the PLDA system requires always a code Y040 (VAT number) also for scenario's where there is no VAT number.  
This should be changed.

*Our Legal Department has confirmed me that this can be changed in PLDA. Ticket 29654 has been created. This ticket will be part of PLDA17.9.*

*This issue must be tested (request from Martin)*

*The ticket has shifted to PLDA17.10.*

*Awaiting installation PLDA 17.10*

*This ticket wasn't part of PLDA17.10. An internal meeting concerning the validation rules of EORI and VAT-numbers will be organised by the end of April. Then a new planning can be given*

**Please report state of play.**

*The National Bank of Belgium has made remarks regarding the correctness of the VAT numbers mentioned in box 44.  
The link between the EORI number and the VAT number mentioned in box 44 is under investigation.  
Next week a new meeting with the NBB is planned.*

More information will be supplied after the meeting.

## 2. Adapt customs systems to UCC

### Organization of ICT-workgroup for data analyses

#### UCC Compare Cuscar data definition with UCC annex B G3 and G4 definition

The comparison was made on 5/5/2017.

The comparison was made and distributed by email to Customs and all members on 7/5/2017.

The members found considerable differences in concept and data definition between both messages. For further information please refer to the email.

The members would like to be informed on the next steps/planning taken by Customs.

If a BPM session would be advisable some members would like to participate.

First meeting European ProjectGroup on 11 and 12 September. 13 Member States .Goal is a BPM and Common Specifications for the members of this Project Group

Meeting 23 and 24 October 2017. If needed in the upcoming meetings members of the group WG ICT – Softwareleveranciers will be consulted.

During the meeting the BPM for AIR has been discussed. At the end of the meeting it was clear that an agreement wasn't possible yet. All the participants have taken the possible scenarios back home for further study. Our goal is to have an agreement during the next meeting (12 and 13 December 2017)

The working group is working further on L4 BPM Air. We expect to finalize level 4 at the end of next meeting. Next meeting on 27 and 28 February 2018.

L4 hasn't been finalised, because the link with the new ICS2-system had to be clarified. Next meeting (18 and 19 April) 3 ICS2-experts of the EU will be present and we hope to finalise the L4. Once the L4 has been finished, it can be send to the EU for validation.

#### Please report state of play

L4 was not fully finalized. Only the link with ICS2 was discussed. A new MIG will be discussed in the meetings planned on 19 and 20 June. After the meeting more information will be supplied.

The next meeting is planned after the summer vacations on 4 and 5 September in Luxembourg.

## 3. Starteam number 23222

Customs will, together with IBM and ICT, investigate whether following statuses can be transmitted.

- Financiële afhandeling opgestart ( contante betaling)
- Klaar voor controle
- Controle door MODA

Because the upgrades to CCFE and CCRM have taken place in the meantime, this issue remains on the agenda.

As mentioned during the last meeting, this will be integrated during the review of the import process

Here are the statuses we asked for

STATUS AANGIFTE	STATUT DE LA DÉCLARATION
<input type="checkbox"/> Financiële afhandeling OK	<input type="checkbox"/> Traitement financier OK
<input type="checkbox"/> Gecontroleerd	<input type="checkbox"/> Vérifiée
<input type="checkbox"/> Annulatie aangevraagd	<input type="checkbox"/> Annulation Demandée
<input type="checkbox"/> Afgeschreven	<input type="checkbox"/> Apurée
<input type="checkbox"/> Onregelmatigheden vastgesteld	<input type="checkbox"/> Irrégularités détectées
<input type="checkbox"/> Gevalideerd door NCTS	<input type="checkbox"/> Validée par NCTS
<input type="checkbox"/> Financiële afhandeling opgestart	<input type="checkbox"/> Traitement financier en cours
<input type="checkbox"/> Ongeldig	<input type="checkbox"/> Invalide
<input type="checkbox"/> Regularisatie aangevraagd	<input type="checkbox"/> Régularisation demandée
<input type="checkbox"/> Wachten op antwoord van NCTS	<input type="checkbox"/> En attente d'une réponse de NCTS
<input type="checkbox"/> Afgewezen na aankomst goederen	<input type="checkbox"/> Afgewezen na aankomst goederen
<input type="checkbox"/> Niet actie	<input type="checkbox"/> Inactif
<input type="checkbox"/> Aangifte onder wijziging	<input type="checkbox"/> Déclaration sous amendement
<input type="checkbox"/> Goederen zijn niet om uit te gaan	<input type="checkbox"/> Biens seront interdits de sortir
<input type="checkbox"/> ENS Geregistreerd	<input type="checkbox"/> ENS Enregistré
<input type="checkbox"/> Afgehandeld	<input type="checkbox"/> Complétée
<input type="checkbox"/> Regularisatie geweigerd	<input type="checkbox"/> Régularisation refusée
<input type="checkbox"/> Geannuleerd	<input type="checkbox"/> Annulée
<input type="checkbox"/> Goederen vrijgegeven	<input type="checkbox"/> Marchandises libérées
<input type="checkbox"/> Op voorhand gereserveerd	<input type="checkbox"/> Réservée à l'avance
<input type="checkbox"/> Klaar voor controle	<input type="checkbox"/> A Vérifier
<input type="checkbox"/> Annulatie aanvraag van NCTS	<input type="checkbox"/> Annulation demandée par NCT:
<input type="checkbox"/> Aanvraag tot TC verworpen	<input type="checkbox"/> Demande de CT rejetée
<input type="checkbox"/> Fout tijdens financiële afhandeling	<input type="checkbox"/> Erreur lors du traitement financier
<input type="checkbox"/> AER	<input type="checkbox"/> AER
<input type="checkbox"/> Afschrijving verworpen door NCTS	<input type="checkbox"/> Apurement refusé par NCTS
<input type="checkbox"/> Wachten op bevestiging aanzuivering door NCTS	<input type="checkbox"/> En attente de la confirmation d'apurement par NCTS
<input type="checkbox"/> Controle door MODA	<input type="checkbox"/> Vérification par MODA
<input type="checkbox"/> Onder release verzoek	<input type="checkbox"/> Sous demande de liberation
<input type="checkbox"/> Wijziging afgewezen	<input type="checkbox"/> Amendement rejeté
<input type="checkbox"/> Onder Afsluiten	<input type="checkbox"/> Onder Afsluiten
<input type="checkbox"/> Onder Behandeling	<input type="checkbox"/> À l'étude
<input type="checkbox"/> Wachten Akkoord Directie	<input type="checkbox"/> En attente d'accord de la direction

The statuses were added to the request. They will be taken into account when the PLDA will be reworked. At the latest it must be ready before end 2020.

The Item remains on the agenda  
OK

## 4. Performance Customs applications

**a. Limit of 999 tariff items in declaration**

In XML it is only possible to send a few hundred items per declaration (200 to 300) without time-out. In EDFACT it is however possible to send 999 items without time-out. According to CRSNP, it is not working in XML due to:

- The XML message is much larger than the EDIFACT message?
- The XML message is converted to an EDIFACT message before processing by Customs?

Limit of 999 tariff lines: this has improved, but 999 lines is still problematic. Important topic for the WG ICT.

*Extra monitoring has been added by our ICT Department. More info has been transferred to IBM.*

*Monitoring has shown us that there is a performance problem with the AEO web service. This problem will be solved in AEO. A new version of AEO will be delivered and we expect to install this version in production in January 2018. After this installation, the monitoring of our applications will go on.*

*The AEO web service has been updated and no performance issues have been reported on this part of the application. Further monitoring is going on and on Monday new data for investigation has been provided.*

*For the performance of our most important applications, working groups have been put in place. For PLDA every Monday an extensive monitoring and analysis with Dynatrace has been scheduled. For EMCS the same monitoring and analysis will be executed.*

*For the PLDA Double Answer-messages a ticket has been opened (Startteam 30012)*

**Please report state of play.**

*See b. hereafter*

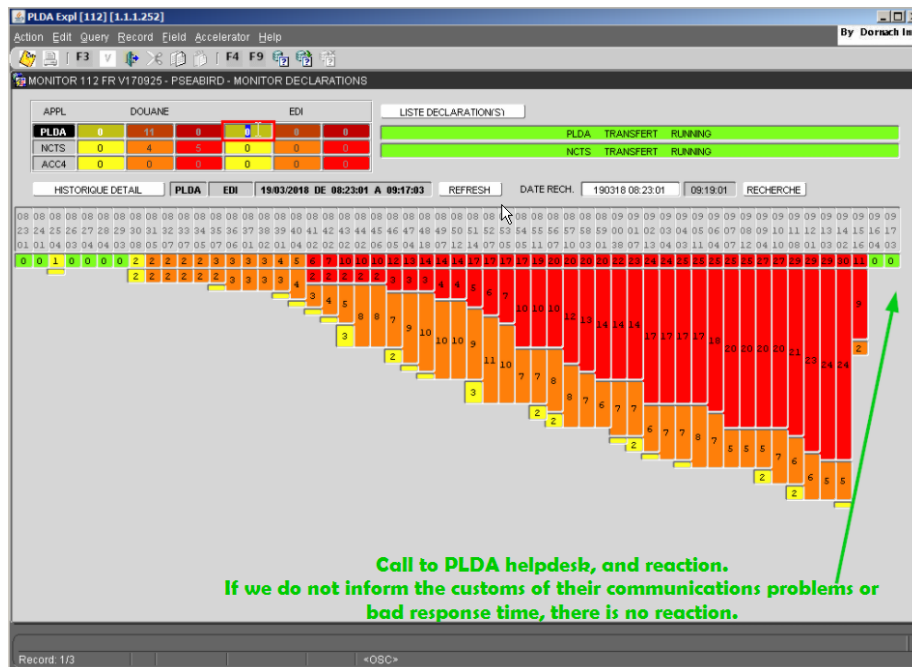

**b. General delay since some time**

The general performance of PLDA on some points seems to be deteriorating. A .pdf outprint of a released document is received nearly immediately, whereas the XML message of the release (on which the printed document is based) is sent one hour later.

Performance of NCTS is even worse.

Question : Can customs monitor the performance of their systems ?

If needed we can give some statistics.

**Please report state of play.**

*Every Monday a full monitoring of the systems is carried out. Apparently it is not a server problem but the lack of performance would be due to a number of issues such as network and software issues (unoptimised DB queries, unoptimized links between systems etc.)*

**5. Electronic Consolidation (Globalisatie)**

*For the moment the project has been set on hold because there is a huge difference in the received statistics from the software houses and from the Customs offices. Further investigation is needed.*

Statistics are clear, but the Project is still on hold. Some questions have to be answered but the project manager of PLDA didn't find the time yet.

On 21/11 a meeting of the WG globalization has been planned. We understand that the project is on hold because of budget limitations and a great impact on the customs hardware. Much more data must be processed than today and the actual set-up is not capable to cope with it. Consequently the question is : Makes this meeting still sense ? Or is it cancelled ?

Since Monday 13 November 2017 the project has been resumed. Meeting of 21/11 has been postponed until 19/12.

The meetings have been resumed. First meeting was on 9/1/2018. The application is planned to go live on 1/5/2019. First and next step in the process is the issuing of the specifications. As far as we understood the original idea of working remains.

Indeed the original idea remains

When will the specifications be available ?

We understand the GEFEG tool was used for the data model ?

What would be the added value for the CRSNP members when also using the GEFEG tool. In other words, what is available from BE customs that can be imported or transmitted to the GEFEG tools of the members ?

The specs will be available by the end of May.

For the specifications the GEFEG tool hasn't been used. For the other UCC-projects we will use this tool.

The specs are based on the EU data model.

Please note that before the "globalisatie" can be put in operation the customs system must be upgraded, as we expect at least 100 % increase in number of declarations to be processed.

This project has still to be started.

As I understand the CRSNP members will first study the specs and will come back with observations

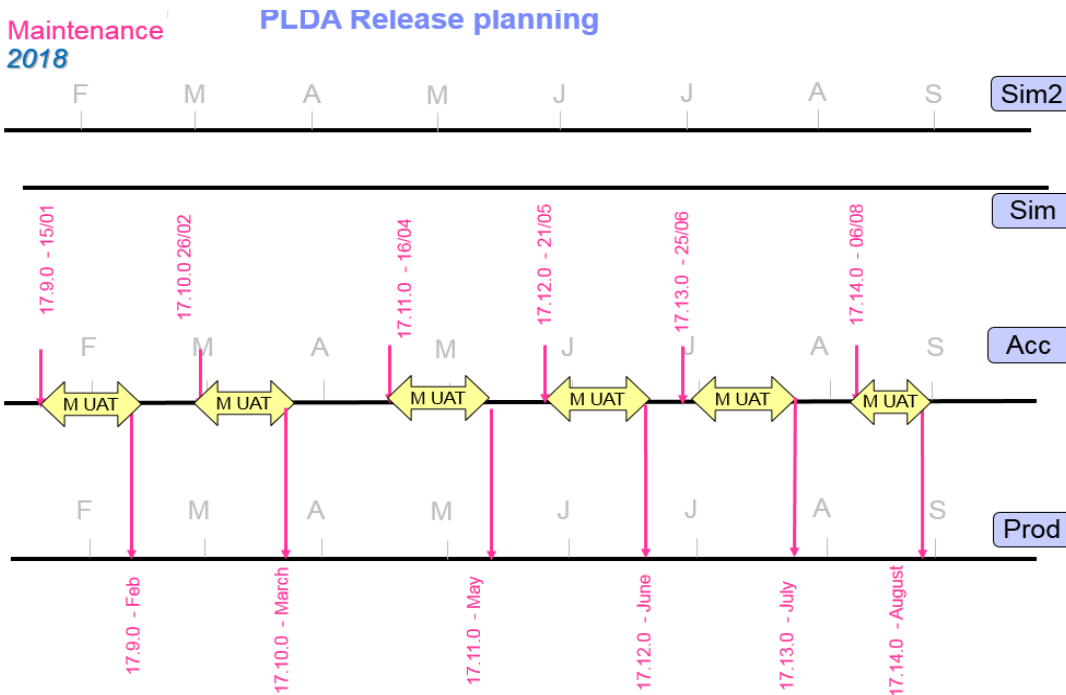

Please report state of play.

When will the specifications be available ?

The specifications will be delivered in the upcoming weeks. They need to be evaluated internally first before their publication. The publication is planned in the next weeks.

After the summer vacations we will plan a new consultation date. However please forward as soon as possible the remarks. In such manner IBM will be able to take the remarks into account.

## 6. Short term planning

Please find the new planning here. Release 17.11 and 17.12 will go in production together. In release 17.12 are only a few tickets covered since the focus of this release is test unit coverage. Whereas the former tests on the software were minimal, the new goal of 50 % of the software is set. 50 % of the software should be tested before going into production. PLDA17.11 and PLDA17.12 will be installed in production on 13/6/18.

## 7. Expired certificates

How can we, using a Get Status message, after the renewal of an expired certificate request the status of a particular declaration?

It may concern thousands of messages. Many declarations with an Exit Confirmation or "Regularisaties" are not confirmed through the normal IT channels and are retrieved using a Get Status message. How can this be solved ?

*David Vandendriessche will attend the next meeting*

We are looking forward to his solution proposal

*To solve this problem IBM needs to update the structure of the database. By mid-2018 it should be possible to solve this issue in prod.*

This issue is treated in the subcommittee "communicatie en authenticatie"  
See topic further in this report.

*IBM and our ICT Department are investigating how they can solve this issue by mid-2018.*

**Please report state of play.**

*This issues is planned to be resolved in release 17.13.*

## 8. NCTS :

### a) NCTS Roll out (pdf)

It is still not clear what offices will be using the new NCTS application and when they will be activated.  
Can this be clarified ?

*New offices will be rolled out shortly/finally i.e. BE408000 and BE432000. We hope still before the end of June. Others will follow once we notice no major issues (or the issues solved).*

*The idea is to have them changed by clusters of ESD/TAO. Starting up with "Gent"-offices.  
The goal is to have by the end of 2017 all offices should be in NCTS-RW.*

Is there a planning for the next offices after the ones that have been announced?

*BE408000 and BE432000 have been switched to NCTS-RW.*

*The roll-out for next offices depends about how big and troublesome the lessons learned are from this roll-out.*

*Except the fact that the next offices to be rolled out will be in Flanders, we did not come up with a newly fixed planning yet.  
Please note however we already came to the conclusion no more than 2 offices will be migrated at a time.*

*In any case we do stress upon the fact*

*Traders must be aware they should have their email-address for receiving the TAD linked to their EORI (eori.be@minfin.fed.be)*

*Traders working in Simplified procedure, should ask regional KLAMA-services to check if their authorizations are correctly and fully registered in the DB of Authorizations. Once their authorizations is registered in this DB, they can ask*

*ncts.helpdesk@minfin.fed.be to register their UNLO-Code also in the actual NCTS so they can start using the UNLO-code instead of the VP-code*

*The use of "camion...truck" as identity of means of transport, is yet not allowed, and in the new system checked by the system.  
So this is not something new...*

*Before we roll out a new office we do the exercise in TEST with PROD-data. For traders it means that if they ask for it, they can already test if their application is congruent to what is coming up.*

*In the attached file you'll find the planning of the migration. This planning can still change.*

We are looking forward to the upgrades. However we would have preferred that only the involved offices would be out of service and not the whole Belgian NCTS application.

Is the plan still to upgrade all offices before 1/7/2018 ?

*It's impossible to migrate the offices when a part of the system is up and running. We hope to finalize the migration by the end of May. An updated planning has been published on our website. A bug was discovered in the system for the write-off. Customs is working to solve this issue as soon as possible.*

*Please also note that when sending discharge remarks the case seals must be ticked when the shipment is ok.*

*ANR is delayed till 24 May.*

**Please report state of play.**

*Today the Antwerp office is being converted The conversions will end by July as planned.*

*On the other hand the members of CRSNP estimate that 4 times a year a total unavailability of the customs system for one full day is very high. Customs is investigating to reactivate the double fail-over system in order to limit the unavailability.*

### b) Emergency procedure NCTS

There are a few issues which we want to bring to the table for general clarity :

- 1) It is not possible to print a red stamp on the document. Can this not be replaced by a text or stamp in normal color ?  
Printing in color is not common. The issue was already reported a few times.
- 2) There are no local offices anymore. It results in the fact that truck drivers sometimes have to drive large distances to the next nearest customs office. It makes the emergency procedure very impractical for many users. Is there no work around possible for general use ?

*AADA will verify if the emergency procedures can't be changed. The emergency procedures will be adapted, a new circular will be published soon. The emergency procedure would work in such a way that there is no further need to go with the shipment to the nearest customs office for a stamp. The system would work in a similar way as the authorized shipper authorization.*

**Please report state of play.**

*No update available.*

## 9. Cuscar

About the new field for the representation (direct/indirect): Which EORI must be submitted, always the one from the declarant ? Is this the EORI of the Ship owner/operator when direct representation and the EORI of the agent when indirect representation ?

*Reply not yet received from the claims department.*

*No further news from the claims department.*

**Please report state of play**

*The situation has not changed.*

### Cuscar Transfer (overbengen)

Can customs supply us an example message with function code 8 ?

Has customs already tested the message ?

Is there no UNB segment missing ? During development our specialist was of opinion that the message cannot work without it since missing essential data

As we understood from the last meeting WG binnenbrengen of 29/9 there is no customs instruction / procedure yet how to use the "Transfer" function of specifying the responsibilities and way of use.

When is it expected to be ready ?

*As discussed during the CRSNP meeting of 14/11/2017, Cuscar RTO will be used by customs and software providers as a test case to publish technical as well as functional specifications for this change. Customs will publish asap the necessary info.*

After the last exchange and supply of data from customs several software providers have been able to send a technical perfect message and received answers from Customs. The thing that is still missing is a part of the use case.

More on how the message should be used in practice.

Software providers do not understand how this message works in practice.

I.e. Who will be sending the message ? The departing or receiving TS operator ?

How will he identify himself ? Will he need to have an agent code or an EORI number or both ?

Is there already a reply or instruction how this should be used in practice ?

*Ilse Eelen is finalizing this instruction. It will be for Maritime and Aviation.*

**Please report state of play**

*The instruction should be valid for the total Belgian territory. The procedure is nearly finished. We need to wait for the outcome. The issue is treated in the WG "binnenbrengen".*

## 10. Locations codes box 30

One of the files from Customs was corrupt, but this was already replaced with a correct file.

The new location codes we've received on 1/11 directly from customs, removed

The code list is not complete, for example following codes are missing (including the MRN of the declaration that had these codes)

BEBRUZ1124001	17BEA0000038367389
BEDTOZ3161002	17BEI0000038403207
BEANR00524	17BEE0000038796308

This issue will be checked by martin and reported later if still existing

BEANR00524 was present in the file of 1/11

BEBRUZ1124001 wasn't present in the file because this location code has an end date of 10/05/2016

BEDTOZ3161002 wasn't present in the file. Ticket 29690 has been created for further investigation.

After investigation by Martin :

BEANR00524 was present in the file of 1/11 : **OK in recente extracten**

*Solved*

BEBRUZ1124001 wasn't present in the file because this location code has an end date of 10/05/2016 : nog altijd in gebruik en gevalideerd in AC4 : MRN 18BEA0000001610220 van 11/01/2018.

*BEBRUZ1124001 was present in the message of declaration 18BEA000001610220 . This looks also ok to me.*

BEDTOZ3161002 wasn't present in the file. Ticket 29690 has been created for further investigation. => *OK in laatste extract*

*Solved*

The above issues were solved but we do not receive any good files anymore. The files are corrupt. Please try to send us a new updated uncorrupted file.

*The file of 1 April 2018 was OK.*

**The file of 1 May 2018 was clearly corrupt again.**

*The procedure is under investigation. Let us wait and see the new delivery on 1 June.*

## 11. Meeting on communication and authentication

IT customs wants to move NCTS and PLDA to the same communication protocol

Following protocols are offered: Web services/FTP/AS2/IDcard or token.

A separate meeting will be organized by the CRSNP communication providers for the members that perform communication. Descartes will take the initiative and inform the result to customs.

*A meeting with a smaller group of software providers has been scheduled. First meeting will take place on 23 November 2017.*

The members have expressed their concern in a message to the customs authorities regarding the new way of communication. The topic has a general impact on all economic operators and should be treated on a national forum level. A preliminary meeting with a small delegation of communication providers is foreseen on 6/2 10.00 h in NG probably room A13

*Meeting is foreseen on 8/2/2017. Meeting Room A08*

**The report on the meeting "communicatie en authenticatie" held on 8/2 sheds more light on the resolution of this issue. We are looking forward to the next meeting on 19/4.**

*No further steps were taken. The issue is temporary suspended for more urgent matters. As soon as the IT provider will reactivate the project you will be informed.*

## 12. Change "Charge report" to use as "Arrival at Exit" (IE507) for the terminals.

1.5.1	Reference type	n1	1 = MAWB 2 = Permit (including RoRo) 3 = Containernumber 4 = VIN (RoRo)		<arrivalIdType>
1.5.2	<b>Reference</b>	an..40	(M)AWB Number (Air freight) or Permit (Sea freight) containernumber or VIN number (Sea freight)	R9 R10 R11	<arrivalId>
1.5.3	<b>Package type</b>	an2	ISO code for packages (UNECE Recommendation No. 21)	R12	<packageType>
1.5.4	<b>Quantity</b>	n..6	Quantity	R8 R13	<quantity>
1.5.5	<b>Gross mass</b>	n..11,3	Gross mass in KGM	R14	<weight>
1.5.6	<b>Size and type</b>	an..10	Container size/type - ISO	C1	<SizeType>
1.6	MRN			R4	<MRN>
1.6.1	<b>Reference type</b>	an3	ABT = MRN export (ECS) XTT = Transit decl. - Transit XTR = Transit decl. - BE XTX = Manual transit declaration XSE = Manual SAD XAG = AGD (Excise) XT5 = T5 XSP = Rail waybill number XMA = Non SAD documents AIO = Transshipment number EXS = Exit Summary Declaration AHI = Transport contract reference number (carrier's agent release number) ANN = Transport Equipment Announcement Number BN = Booking reference number CN = Carrier's reference number UCN = Unique consignment reference number NPX = Emergency procedure	R5	<mrnReferenceType>
1.6.2	<b>Reference</b>	an..35	Number of the declaration	R6	<mrnReference>

Foreseen in PLDA17.10, but not yet confirmed.

When will this message be available for testing ?

*These changes have been already installed in Production and can be tested.*

*Please note that under ref 1.5.1 in the message above the code for VIN = 5 (not 4)*

*We understood that, if the message only refers to the container id's the system will have an issue, while the same container returns often and this means that data will not be handled correctly. Customs will investigate in order to provide a solution.*

**Please report state of play.**

*The activation in operation is postponed to 1/9.*

*The Antwerp Port Authorities have taken an initiative in order to automate the breakbulk flow in the port of Antwerp. They use the Cubix system which allows for split shipments of one MRN declaration. It keeps an (export) accounting of the material actually shipped. Dorothy Cardoen has made the analyses. The export accounting is based on the unique booking reference as already agreed in the proposal of 2006.*

*Rumors exist that the implementation of the export manifest would be postponed until there would be a final solution on breakbulk? In view of the fact that containerized cargo covers abt. 80 % of the export in the Antwerp port CRSNP advise not to wait until a final decision is made on breakbulk but start to implement the export manifest for containerized cargo as soon as the issues are resolved for containerized cargo, and later go to the next steps.*

### 13. New measures Tarbel (1/2/2018)

*Solved/Removed*

### 14. Regularisatie aangiften (nieuw)

Volgende bemerkingen werden ons ter beschikking gesteld via douane :

“Zoals gezegd mogen wij geen regularisaties meer toestaan zowel bij bestemming als bij vertrek nadat wij een vaststelling gedaan hebben. De aangiftes blijven in de status “onregelmatigheden vastgesteld”

Bij vertrek dienen jullie een nieuwe aangifte op te maken.

Dit volgens artikel 173 paragraaf 2 van het DWU;

“Artikel 173

Wijziging van een douaneaangifte

1. De aangever wordt, op zijn verzoek, toegestaan een of meer gegevens in de douaneaangifte te wijzigen nadat deze door de douane is aanvaard. De wijziging mag niet tot gevolg hebben dat de douaneaangifte betrekking heeft op andere goederen dan die waarop zij oorspronkelijk betrekking had.

2. Dergelijke wijzigingen worden niet toegestaan als het verzoek daartoe wordt gedaan na een van de volgende gebeurtenissen:

a) de douaneautoriteiten hebben de aangever in kennis gesteld van hun voornemen de goederen aan een onderzoek te onderwerpen;

b) de douaneautoriteiten hebben geconstateerd dat de gegevens van de douaneaangifte onjuist zijn;

c) de douaneautoriteiten hebben de goederen vrijgegeven.”

Lisette Wijnen

Adjunct Fiscaal Deskundige

FOD Financiën / Douane en Accijnzen / Toezicht, Controle en Vaststellingen

TCV Bilzen

Kruisbosstraat 16 3740 Bilzen

Tel: +32 257 584 99 / Gsm: +32 4707 584 99 / Dienst +32 257 52150

Dienst mail: da.tcv.emt.bilzen@minfin.fed.be”

Because of this new way of working, declarations that have been verified and on which anomalies have been established are left in the BTB applications in a status MRN and cannot be processed any further. In the PLDA web they are left in status “onregelmatigheden vastgesteld” Customs does not send any further messages.

In practice this means that no proof or document is received from customs by the importer or exporter in order to prove the regularly imported or exported goods.

On the other hand we understand that some customs offices demand a new electronic declaration without reference to the previous one, leaving the system with two declarations for the same shipment.

The issue is also escalated to the WG “Algemene Bepalingen”, but it is necessary that PLDA provides a uniform and automated solution (as in NL,DE..)

An exhaustive e-mail has been sent to WG Algemene Bepalingen in order to supply a solution.

*It's correct that PLDA has to provide a uniform and automated solution, but we are also waiting for a clear guideline of our experts. As long as we don't receive this guideline, PLDA will not be changed. An internal meeting will be organized to discuss which changes to PLDA have to be done.*

**Please report state of play.**

*Customs plans tomorrow a meeting in order to investigate the measures to be taken in PLDA. It is important for the VAT administration that a document of message is available proving the regularly authorized import or export of goods. Apparently a knowledge center/workgroup customs/excise/VAT will be established to treat this kind of issues.*

## 15. Declaration type D

The declaration type D is sent to customs before presentation of the consignment to customs in order to write off the GC.

However we have noticed that still declarations go wrong. They receive an MRN when submitted to customs, but later, after arrival of the ship, they receive again an error

Questions :

What checks are performed after the arrival of the vessel that cause these errors ?

What error messages can be expected ?

*A complete validation is executed at the moment the goods arrive. For the moment there is a bug in the system which causes the weird errors.*

*AADA will investigate if it is possible to use a different function code in case an error has been found at the moment of the arrival of the goods (new validation results in an error after the MRN). Ticket 30291 has been created.*

**Please report state of play**

*The solution is delivered in test. It will be taken into production with release 17.12.*

## 16. Issues test system

Would it be possible to copy again the EORI database to the test systems.

Ziegler has 15000 correct declarations which are readily available to be sent to the test system for testing new applications but 1879 of declarations get now errors because the EORI numbers are not in the test database.

This is also the case for the BTW verleggingen ET14000...

*AADA will investigate if it is possible to update the test-DB of EORI or if it is possible to link PLDA-Test again to EORI-Prod.*

**Please report state of play**

*One of the two solutions will be carried out by customs :*

*Either a set of EORI numbers will be made available in the test system, or the test system will be linked to the operational EORI database.*

*This issue must be resolved before the tests can start for the new Tarbel calculation*

## 17. Issues with the Taric system

The Excise tariffs for tobacco are missing from the Excel file

Can this be corrected?

*AADA will update the extractions of Tarbel*

**Please report state of play**

*Can someone verify if this is still an issue.*

## 18. XML-extracties Tarbel 2

*By the end of August we hope to activate Tarbel 2 in Production. This means that the extraction of the data will change. There won't be a monthly extraction, but a daily extraction that can be downloaded. XSD and further explanation have been added.*

The screenshot displays the 'Integrated Tariff Information System' interface. At the top, it shows the simulation date as '2018-04-04' and language options for EN, DE, FR, and NL. The main navigation bar includes 'HOME', 'TARIFF CONSULTATION', 'DUTY CALCULATOR', 'DAILY NEWS', 'CONTACT', 'HELP', and 'FAQ'. A sidebar on the left lists various functions like 'Tariff browser', 'Text search', 'Correlation table', etc., with 'XML extractions' highlighted. The main content area is titled 'XML extractions' and features search filters for 'Search year' (2018) and 'Search month' (04), along with 'Search' and 'Download' buttons. Below this is a 'Download XML documentation' link. The 'Search results' table lists three XML files with their filenames and 'Download' buttons. At the bottom of the table, it states 'Total records found: 3'. The footer contains the copyright notice 'Copyright © European Dynamics 2014 - 2017' and the last update date '2017-04-25'.

*This change can have a huge impact on PLDA. A new DB will be used to extract the Taric-DB for PLDA. It is obvious that this change needs to be tested. Therefore a testing day will be organized to be sure that there are no differences in the calculations on a declaration.*

#### **Proposition Test Day: 20 June**

*Customs will propose a new date in June because later would be a problem because of summer vacations*

*The new Tarbel should be available on the test system. Sonja would already have made an extraction. CRSNP members should inform how much time they need to implement the new Tarbel. In the meantime the old extractions should remain available.*

#### **19. Probleem GCB**

**Als een HAWB met deelzendingen wordt gemaakt en de deelzending komt met 2 verschillende vluchten toe op DEZELFDE DAG, dan :**

- Kan men niet alles afschrijven. Alleen het laatste aantal kan men aanzuiveren.
- Als op basis van vluchtnummer en house, dan zien ze slecht 1 deelzending
- Als men op lijstnr of HAWB, ziet men alleen laatste deelzending
- De douane ziet dus nooit de volledige info van een HAWB

*Johan Geerts has supplied an example and customs will investigate. Ticket 30572 has been created for further investigation.*

#### **20. Next meeting R&D**

*20/9 en 22/11 in Brussels as usual in the North Galaxy Building.*

#### **21. COMMISSION IMPLEMENTING REGULATION 2018 -724 OF 16 MAY 2018**

*It concerns measures taken as countermeasures against the USA Steel and Aluminum regulation*

*The text of the regulation is available [here](#).*

*End of report*
